

 <p>liquibox® Now part of SEE</p>	<p><i>Food Safety and Safety Policy</i></p>	PISEEA
		Issue 2 Revision 7
		28/08/2024

Our policy regarding **Food Safety and Safety** is based on supplying products that meet the needs of Customers, in quality, price and that these are innocuous and safe. To achieve this, a process of continuous improvement is followed that guarantees the future and development of the Company, understanding that this is the only method capable of maintaining and even improving the position it occupies today in the market.

LIQUI-BOX SPAIN, S.L.U., is dedicated to the manufacture of flexible plastic packaging for liquids and semi-liquids, through heat sealing from their components separately for the Bag-in-Box application in the food industry. In some cases, the product undergoes an asepsis process through its subcontracted irradiation. We offer tailor-made solutions for developments in plastic materials applied to direct and promotional marketing. Our efforts are focused on improving the sustainability of our products and services, developing even more recyclable packaging with fewer raw materials without compromising its physicochemical properties.

LIQUI-BOX SPAIN, S.L.U., in its commitment to food safety, has developed and implemented a Food Safety and Safety Management System based on the **BRCGS PROTOCOL in the latest version available**. In line with this commitment, our principles regarding the Quality and Food Safety of the product are:

- To provide our product with the highest level of **quality, safety and food safety**.
- Establish a formal **commitment** from the **entire Company** and especially from its **Management** to achieve the continuous improvement of the SGISEEA and compliance with all the requirements of the **BRCGS PROTOCOL** as well as the legal and regulatory requirements applicable to our activity and sector.
- To involve all the staff of LIQUI-BOX SPAIN, S.L.U., in the **development of the EMS** and in the **fulfilment of our Policies** and the established **objectives**, at all relevant levels of the Organisation.
- To be **committed to our Clients**, providing solutions according to their different needs thanks to personal advice from the first moment of commercial relations.
- Ensure the **compatibility** of our product **with the application and end use**.

In addition to these criteria, we consider key elements:

- To know the needs and expectations of our Customers, to **guarantee** their complete **satisfaction**.
- meet the requirements and continuously improve the **effectiveness of the Quality system**.
- To develop and train the entire Organization in a **culture of quality**.
- Communicate and make the **Policy understood** within the Company.
- Provide a framework for setting and reviewing **Quality objectives**.
- Implementation of a continuous **improvement process** throughout the Company.
- To offer **competitive products** in the market through industrial processes of the highest quality, profitable and respectful of the environment.
- provide adequate means and resources to achieve our objectives, always putting the Client at the centre of our activities,

Management undertakes to review this Policy annually and to make the necessary modifications to the EMSIS to ensure that it is kept up to date and adapted to the legal requirements of our clients.

LIQUI-BOX SPAIN, S.L.U.,
